            <Interval>
                <Pos v="11"/>
                <Qty v="19"/>
                <PriceAmount v="0.9"/>
            </Interval>
            <Interval>
                <Pos v="12"/>
                <Qty v="19"/>
                <PriceAmount v="0.9"/>
            </Interval>
            <Interval>
                <Pos v="13"/>
                <Qty v="19"/>
                <PriceAmount v="0.9"/>
            </Interval>
            <Interval>
                <Pos v="14"/>
                <Qty v="19"/>
                <PriceAmount v="0.9"/>
            </Interval>
        </Period>
    </BidTimeSeries>
    <BidTimeSeries>
        <BidIdentification v="2"/>
        <AuctionIdentification v="ALRS-M-10072013-23109"/>
```

TimeSeries must contain as many Pos (position) as LT auction has days

Qty (quantity) is value of bid in MW

PriceAmount defines offered price for bid

Bid Example

- Delivered xml file in e-mail contains 3 bids:
  - › 1st bid   - 19MW 0.9€
  - › 2nd bid   - 30MW 0.7€
  - › 3rd bid   - 15MW 1.5€
